PETITION FOR SPECIAL RELIEF

Service Electric Cable Television, Inc. ("Service Electric"), by counsel and pursuant to § 76.7 of the Commission's Rules, 47 C.F.R. § 76.7, hereby petitions the Commission to modify the Philadelphia, Pennsylvania Designated Market Area ("DMA") for purposes of the Commission's mandatory carriage rules by excluding the cable communities listed on the attached Appendix (the "Communities"), each of which is located in the DMA, from the television market of television broadcast station WACP, Channel 4, Atlantic City, New Jersey ("WACP"), licensed to Western Pacific Broadcast LLC ("Western Pacific").

The following is shown in support thereof:

I. INTRODUCTION

The Commission may "with respect to a particular television broadcast station, include additional communities within its television market *or exclude communities from such station's television market* to better effectuate the purposes of this section".¹ The must carry rules were

¹ 47 U.S.C. §614(h)(1)(C) (emphasis added).

not intended to mandate cable carriage of stations that are not considered "local" by a cable system's subscribers:

The Committee recognizes that since ADIs are drawn along county lines, they may in some instances, inaccurately reflect the stations which are local to a particular community [T]he FCC may make an adjustment to include or exclude particular communities from a television station's market consistent with Congress' objective to ensure that television stations be carried in the areas which they service and which form their economic market.

The provisions of [this subsection] reflect a recognition that the Commission may conclude that a community within a station's [DMA] may be so far removed from the station that it cannot be deemed part of the station's market.²

II. Market Modification Criteria

In evaluating market modification requests, the Commission is to:

[A]fford particular attention to the value of localism by taking into account such factors as –

(I) whether the station, or similarly situated stations, have been historically carried on the cable system or systems within such community;

(II) whether the station provides coverage or other local service to the community;

(III) whether any other television station that is eligible to be carried by a cable system in such community in fulfillment of the requirements of this section provides news coverage of issues of concern to such community or provides carriage or coverage of sporting and other events of interest to the community; and

(IV) evidence of viewing patterns in cable and noncable households within areas served by the cable system or systems in such community.³

² H.R. Rept. 102-628, 102d Cong., 2d Sess. 97-98 (1992).

³ *Implementation of the Cable Consumer Protection Act of 1992 (Report & Order - Broadcast Signal Carriage Issues)*, 8 FCC Rcd 2965, 2977 (1993) ("CCPA Report"); 47 U.S.C. §614(h)(1)(C).

The Commission has adopted a standardized evidence approach for market modification petitions.⁴ Pursuant to this approach, petitioners are to submit:

- A map or maps illustrating the relevant community locations and geographic features, station transmitter sites, cable system headend locations, terrain features that would affect station reception, mileage between the community and the television station transmitter site, transportation routes and any other evidence contributing to the scope of the market.
- Grade B contour maps delineating the station's technical service area and showing the location of the cable system headends and communities in relation to the service areas. (Service area maps using Longley-Rice (version 1.2.2) propagation curves may also be included to support a technical service exhibit.)⁵
- Available data on shopping and labor patterns in the local market.
- Television station programming information derived from station logs or the local edition of the television guide.
- Cable system channel line-up cards or other exhibits establishing historic carriage, such as television guide listings.
- Published audience data for the relevant station showing its average all day audience (i.e., the reported audience averaged over Sunday-Saturday, 7 a.m.-1 a.m., or an equivalent time period) for both cable and noncable households or other specific audience indicia, such as station advertising and sales data or viewer contribution records.

⁵ The digital equivalent of the Grade B contour for market-modification purposes is the noise-limited contour. See *Mountain Broadcasting Corporation*, 27 FCC Rcd 2231 (Media Bureau, 2012) at n. 9.

Service Electric's subject cable system serves subscribers in Pennsylvania's Bucks, Lehigh and Northampton Counties, all of which are part of the Philadelphia DMA.⁶ Service Electric demonstrates herein through submission of the required evidence that WACP is not providing any local technical or programming service to the Communities; that no other nexus exists to minimize the substantial geographic distance between WACP's city of license and the Communities; and that modification of its television market is in the public interest.⁷

III. MARKET FACTS

The Philadelphia DMA is the nation's fourth largest television market. It includes 2,993,370 households and 15 commercial television stations.⁸ Geographically, it encompasses 18 counties in three states. Culturally, it is diverse and comprises a wide scope of populations. Atlantic City (WACP's city of license) and the Bethlehem, PA (the subject system's headend) are 130 miles distant by road and lie respectively near the extreme Southeast and Northwest edges of the DMA, with an estimated driving time between them of two hours 14 minutes.⁹ The border between New Jersey and Pennsylvania lies approximately mid-way between Atlantic City and the Communities. A mountain ridge provides a further geographic barrier between New Jersey and the Communities.

⁶ *Television and Cable Factbook No. 80* (2012), p. A-1068.

⁷ On December 14, 2012, Western Pacific filed a must-carry complaint (CSR-8757-M) against a separate entity than Service Electric seeking carriage on Service Electric's cable system serving the Communities. It subsequently filed a January 9 "Clarification, Supplement and Correction of Record ..." to specify Service Electric as the defendant with respect to the Communities. The petition appeared in a *Public Notice*, Report No. 0389, *Special Relief and Show Cause Petitions*, released January 22, 2013. Service Electric is submitting a separate opposition to the must carry complaint and respectfully requests that the Commission consolidate the two proceedings. "The Commission typically consolidates requests for mandatory carriage with market modification requests involving the same television station and communities." *Prime Time Christian Broadcasting, Inc. v. Comcast Cablevision of New Mexico, Inc.*, 17 FCC Rcd 8735 (Media Bureau, May 16, 2002). See also *Frontiervision Operating Partners, L.P., et al*, 17 FCC Rcd 9332 (Media Bureau, 2002). The instant market modification request and Western Pacific's must-carry complaint are directly related in that they involve the same parties and the consideration of interrelated issues. Accordingly, Service Electric requests that the Commission consolidate the two proceedings for decision-making purposes.

IV. THE STANDARDIZED EVIDENCE

The following is a summary of the evidence presented in support of the relief requested herein, organized according to the standardized categories described more fully above:

1. Maps – A depiction of the Philadelphia DMA is attached as **Exhibit A**. An outline of the Communities' service area and headend, relative to the WAPC transmitter site and city of license, is attached as **Exhibit B**.¹⁰ A map depicting the terrain between the headend and New Jersey is attached as **Exhibit C**.
2. Labor patterns – The US Census Bureau website tabulates the numbers of residents of each of the three counties in which the Communities are located who work in Atlantic County, New Jersey, in which the city of license of WAPC is located:
 - Of Bucks County residents, 172 work in Atlantic County, compared to 168,010 who work in Bucks County itself, 20,813 who work in Mercer County, NJ, 48,414 who work in Northampton County, PA, and 31,892 who work in Philadelphia County, PA.
 - Of Lehigh County residents, 13 work in Atlantic County, compared to 110,302 who work in Lehigh County, and 18,040 who work in Northampton County, PA.
 - Of Northampton County residents, 28 work in Atlantic County, compared to 68,449 who work in Northampton County and 30,180 who work in Lehigh County, NJ¹¹
3. Station Programming Information – We have been unable to locate any listing of the specific programming being broadcast by WACP.¹² Upon information and belief it consists predominantly of infomercials (*i.e.*: paid program-length advertising). The FCC's on-line public file for WACP contains its issues/programs lists for the last three calendar quarters of 2012. The only two programs listed are "Our World" at 6:00 a.m. on Saturdays (repeated on Sundays) and "Latin Lifestyle" at 6:30 a.m. each Saturday and repeated the following Sunday. It is readily apparent from the narrative descriptions of each program that they have never addressed a local issue oriented to

¹⁰ Both maps depict the relevant information on copies of the coverage map submitted with the most recent WACP permit modification application, BMPCDT-20111101AJA. That modified permit was covered by the current WACP license, BLCDDT-20120621ABY.

¹¹ <http://www.census.gov/population/www/cen2000/commuting/#NJ> All data cited is based on the 2000 Census. We presume that most of the commuting to Atlantic City for employment in 2000 was to work at the casinos there, and that approximately two years ago the large Sands Casino opened in Bethlehem (Northampton County), which has attracted a substantial number of gamblers from the Communities' area who previously travelled to Atlantic City. Thus it is expected that the current workplace commuting figures will be substantially less than in 2000.

¹² Indeed, upon inquiry Western Pacific's counsel declined to provide such information.

the Communities.¹³ On the other hand, the Communities are provided ample locally-oriented issue-responsive programming from Station WFMZ(TV), Allentown, which bills itself as “News 69” and whose daily schedule comprises nearly 10 hours of news, much of it local, and including a half-hour in Spanish.¹⁴

4. Historic Carriage on Our Cable System – WACP has never been carried in the Communities. Submitted as **Exhibit F** is our current carriage channel line-up in the Communities.¹⁵ Neither WACP nor, for that matter, any other New Jersey station has ever been carried on Service Electric’s cable system serving the Communities (other than two Spanish-language stations, one of which has its transmitter in Pennsylvania; both provide unique service to a substantial ethnic population in the Communities).¹⁶
5. Audience Data – Service Electric does not subscribe to Nielsen or any other audience measurement service and thus is unable to provide specific data. Nonetheless, we note that WACP is not included in either the print or on-line television listings of *The Morning Call*, the Lehigh Valley’s daily newspaper.¹⁷

V. ANALYSIS OF THE FOUR STATUTORY FACTORS

Not one of the four statutory factors enumerated above supports a finding that WACP is local to Service Electric’s Communities.

A. WACP Has No Record of Historical Carriage

WACP fails the historic carriage factor because the station has never been carried on the Service Electric system serving the Communities. Thus, removing the Communities from the

¹³ See: https://stations.fcc.gov/station-profile/wacp/more-public-files/browse-%3eissues_and_programs_lists (viewed February 7, 2013). A copy of those lists is attached as **Exhibit D**. Similarly, the only other information concerning specific programming broadcast by WACP, gleaned from its quarterly Children’s Television Programming Reports, indicates that its children’s programming is wholly syndicated with no local component, much less one that attempts to address the Communities’ region. See: <https://stations.fcc.gov/station-profile/wacp/programs-list> (viewed February 7, 2013).

¹⁴ See: <http://www.locatetv.com/listings/wfmz/08-Feb-2013> for the typical schedule on Friday, February 8, 2013. A copy is included as **Exhibit E**.

¹⁵ An interactive listing is available at: http://www.sectv.com/LV/v_lineups.html.

¹⁶ Lehigh, Northampton and Bucks Counties, in which the Communities are located, have 2011 estimated populations of Hispanic or Latino origin of 19.5%, 10.8% and 4.4%, respectively. The percentages of their populations in which a language other than English is spoken are: 20.9%, 12.4% and 10.6% respectively. <http://quickfacts.census.gov/qfd/states/42000.html>.

¹⁷ Attached as **Exhibit G** are copies of the television listings that appear daily in the print edition and the on-line version, neither of which includes WACP among the 75 channels listed in print and the 102 channels listed on-line. (The print version is from February 4, 2013 and the on-line printout is from 11:27 a.m. on February 6, 2013.)

station's television market would be consistent with the intent of the Act and the rules because there will be no disruption of established viewing patterns.¹⁸

B. WACP Does Not Provide Coverage or Other Local Service to the Communities

Likewise, WACP fails the local service test because the station is geographically remote from the Communities and does not provide local service to the Communities. The Commission has consistently recognized that long distances can attenuate the local ties between a television station and communities nominally within its mandatory carriage zone.¹⁹ Here, the Communities lie between approximately 80 and 120 km from the WACP transmitter site and 125 and 170 km from Atlantic City, WACP's city of license. Historically, distances of 45 to 50 miles have proven decisional in removing a station from the edge of a television market.²⁰ Here, the distance is exacerbated by the terrain that lies between these areas.

Due to the extreme distances and terrain factors, WACP fails to place a reliable signal over the Service Electric headend and the Communities. This is not only evident from Western Pacific's own coverage map, but has been confirmed by a test conducted by Service Electric and witnessed by WACP's chief engineer, which documented that the WACP signal level fell well below that of the noise-limited contour.²¹ Grade B coverage has been held to demonstrate a station's service to cable communities and to reflect a station's natural geographic market.²²

¹⁸ See text at n. 3, *supra*. Western Pacific undoubtedly will seek to diminish the significance of this factor in light of its short history of broadcast operation, which appears to have begun last Summer. However, the Commission recently emphasized that: "lack of historical carriage and dearth of audience shares is of evidential significance when linked with other information regarding the market, including lack of Grade B coverage, geographic distance, and the absence of noncable audience share in relevant communities." *Mountain Broadcasting Corporation*, 27 FCC Rcd 2231 (2012) at ¶ 18, n. 60 (emphasis in original). As discussed, *infra*, these other factors are present here and weigh heavily against carriage of WACP in the Communities.

¹⁹ *Service Electric Cable TV, Inc.*, 12 FCC Rcd 13299, 13309 (1997).

²⁰ *Armstrong Utilities, Inc.*, 12 FCC Rcd 2498 (CSB 1997) at ¶ 17.

²¹ A description of the test methodology and the results is attached as **Exhibit H**.

²² See *CCPA Report, supra*, 8 FCC Rcd at 2977.

Thus the Commission has held that “lack of Grade B coverage is a valid indicator of no local service in market modification cases.”²³ The functional equivalent for digital broadcasting is the noise-limited contour.²⁴

C. WACP Does Not Provide Programming Coverage or Other Local Service to the Communities

Service to a cable community also may be demonstrated through the airing of programming having a distinct nexus to the community.²⁵ Yet WACP fails to air any such programming. This is hardly surprising, since the Communities are located well outside of WACP's economic market. As is clear from its very name, the economic core of the DMA is Philadelphia, located in Pennsylvania, an entirely different state than either the WACP transmitter site or its city of license, and the Communities and WACP's city of license are located at the extreme opposite ends of this large DMA.²⁶ Indeed, the Census Bureau does not consider Atlantic City to be part of the massive Philadelphia-Camden-Wilmington PA-NJ-DE-MD List Metro Area in its Economic Census Local Business Snapshot.²⁷

²³ *CoxCom, Inc.*, 17 FCC Rcd 17192 (MB 2002). Even if WACP were to pledge to take the steps necessary to deliver a good quality signal to East Cleveland's principal headend, it is immaterial to this proceeding. “[A] station's ability or lack of ability to deliver an adequate signal by satellite is not determinative in a modification proceeding. Stations are entitled to employ alternative forms of signal delivery, other than over-the-air, particularly when they wish to ensure the receipt of a good quality signal, but such methods are not considered to be indicators of local service.” *Comcast Cablevision Corporation of California, LLC, Petition For Modification of the DMA Market of Television Broadcast Station KPTF-TV, Farwell, Texas*, 17 FCC Rcd 15626 Para 12 (MB 2002).

²⁴ See, e.g., *Mountain Broadcasting Corporation*, 27 FCC Rcd 2231 (MB 2012) at 2233, n. 9.

²⁵ See *KTNC Licensee, LLC Petition For Modification of the San Francisco, California DMA*, DA 03-2601 (MB, August 06, 2003) (market modified where station did not show any viewership and, “other than generalized statements about its Spanish-language programming, [did not show] that any of its programming has a local nexus to the communities”). See also *Comcast Cablevision Corporation of California, LLC Petition For Modification of the DMA Market of Television Broadcast Station KPTF-TV, Farwell, Texas*, 17 FCC Rcd 15626, para 11 (MB, 2002) (factor weighed in favor of granting request where station did not air any programming local to the communities).

²⁶ As already noted, only a relative handful of residents commute to WACP's city of license and *The Morning Call*, the principal local source of television listings for residents of the Communities, does not list WACP in its TV listings. This serves as further evidence of the lack of a bond between WACP and the Communities. *Time Warner Cable*, 17 FCC Rcd 9542, 9547 (2003) at ¶ 11.

²⁷ http://www.census.gov/econ/census/snapshots_center/phila.html A copy of the Local Business Snapshot is attached as **Exhibit I**. Atlantic City is located where the routes marked as US 30 and 322 hit the Atlantic shore.

D. Other Stations Qualified for Carriage Provide Coverage of News or Programming of Local Interest

The Commission accords evidentiary weight to the coverage provided by other stations when considering whether to modify the market of a distant station that does not provide any local service.²⁸ The Communities receive substantial amounts of local service from other media outlets, including TV station WFMZ, "News 69," which devotes a substantial portion of its broadcast day to news and information directly relevant to the Communities. Other area stations serving the Communities' needs include KYW (CBS), WPHL, WTXF (Fox), WPVI (ABC), WCAU (NBC), WHYY(PBS) and WPSG, all Philadelphia, and WLVT (PBS), Allentown, Pennsylvania, all of which are carried on the Service Electric system.²⁹

Through carriage of these stations, Service Electric's customers enjoy a wide variety of news and public affairs programming of local interest. On the other hand, WACP's programming offers nothing of unique value to the Communities or Service Electric's customers.

E. No Local Viewing Patterns Exist for WACP

Given that WACP does not provide a noise-limited signal to any of the Communities and the inability of persons residing therein to obtain program information about WACP, the station likely has no market share in the Communities.

CONCLUSION

The evidence demonstrates that WACP is geographically distant from Service Electric's cable system and provides no signal coverage or local programming service; that no local viewing patterns would be disrupted; and that other stations qualified for carriage provide

²⁸ *CoxCom, Inc., supra*, 17 FCC Rcd 17192 (2003) at ¶ 11.

²⁹ See Exhibit F.

coverage of news and programming of local interest. Modification of WACP's television market would "better effectuate the purposes"³⁰ of the mandatory carriage rules and is warranted.

Wherefore, the premises considered, Service Electric Cable Television, Inc. respectfully requests that the Commission modify the WACP(TV) television market as requested.

Respectfully submitted,

Service Electric Cable TV Inc .

Signal Test for WACP TV 4.1

Tower location: 1829 Savercool Ave, Bethlehem, PA 18015

Lat: 40.35'55". 075.25'12" AMSL 830 ft

DATE: February 5 2013 11:00 am

Conducted by Jeff Kelly, Director of Engineering and Eric Koon, Senior Engineer

Witnessed By: WACP Chief Engineer Greg Kraft

Test Equipment Blonder Tongue BRY-LP-LB Low band Antenna at 50 feet above ground level

Sunrise Telcom AT2500 RQV Spectrum Analyzer S/N US83706-0609

Sharp 19" digital TV S/N 805994183

KTech DVM-150 E S/N DVMARDND 0611-05

We first set the Low band antenna to 153' True and 165'degrees Magnetic toward the WACP tower.

We hooked up the antenna cable to Spectrum analyzer, set the center Freq to 69.0 Mhz. No signal was detected, but we did detect channel 6.

Secondly, we hooked up the low band antenna to the Sharp 19" TV . We then did a channel scan for Air-TV Digital. It decoded 6.1.6.2. 17.1.173 and 9.1. We stopped the scan. We then manually put in 4.1 into the tuner, still no channel 4.

Lastly, we hooked up the Low Band antenna to the K-Tech 150 Receiver. We selected RF channel 4. It said we had an input of -73.4 dbmv on the input but no carrier lock. We then put in channel 6 and got a carrier lock and input signal of -19.8 dbmv.

After the test Mr. Kraft was satisfied that we could not pick up WACP as stated in our previous test in October of 2012.
